

Typical Specification

Item: Galvanised Steel planters

Materials Used

- Galvanised Steel
 - 0.8 Gauge galvanised steel
 - Nominal thickness 0.9 – 1.0mm

Fabrication Process

- Seams
 - All seams are fabricated by way of a 'lockform' arrangement
- Corner fixing
 - All corners are fixed with rivets
- Drainage
 - As standard our planters are made with drainage holes in the bases and are not water tight
 - Planters can be specified without drainage holes
